PROFESSIONAL SUMMARY

A Software Engineering (D4) student with experience in website, application, and Virtual Reality technology development. Proficient in Laravel, Flutter, PHP, JavaScript, C#, and Unity, with experience in API integration and digital solution development. Capable of working both independently and within a team, with a strong interest in technology and software development.

WORK/INTERNSHIP EXPERIENCE

Magang Web Developer **August 2025 – December 2025**

Bangka Regency Regent's Office

- Developed a web-based asset management system prioritizing functionality and user security for **12 system users** (1 Regional Secretariat Treasurer, 1 Assistant Treasurer, and 10 Division Heads at the Bangka Regent's Office)
- Coordinated with relevant stakeholders to ensure the system met local government standards for security and usability.
- Conducted training on system usage for the 10 Division Heads at the Bangka Regent's Office.

Installation Technician – Ministry of Education Digitalization Program **August 2025 – September 2025**

PT. Hisense Internasional Indonesia

- Install and configure Digital Smart TVs (Interactive Flat Panels) in schools as part of the Ministry of Education's National Digital Learning Program.
- Perform physical installation, bracket mounting, cabling, power connections, initial device configuration, and functional testing to ensure the Digital Smart TVs and related equipment operate correctly.
- Coordinate with school representatives during installation, testing, handover, and internal training to ensure they understand how to use the Digital Smart TVs.
- Complete the installation of **76 units across schools in Bangka Regency** and document the results for project reporting.

EDUCATION

Bangka Belitung State Manufacturing Polytechnic **2023 – 2027 (Perkiraan)**

Bachelor of Applied Engineering (D4) in Software Engineering Technology
Department of Informatics and Business (GPA : 3.85 / 4.00)

Relevant Coursework : Web Programming, Object-Oriented Programming, Mobile Application Development, Database Systems, Software Project and Quality Management, Artificial Intelligence, Probability and Statistics.

ORGANIZATIONAL EXPERIENCE

Perhimpunan Mahasiswa Informatika dan Komputer Nasional – Wilayah III **December 2025 – Present**

Research and Development Coordinator

- Coordinate the work program for the Research and Development division at the Region III level.
- Develop research, study, and discussion activities related to technology and informatics.
- Coordinate members in the execution of research and development activities.

Himpunan Mahasiswa Jurusan Teknik Elektro dan Informatika **Agustus 2024 – Agustus 2025**

Executive Board – Secretary I

- Manage the organization's administration, documentation, and correspondence.
- Support the coordination of the implementation of the organization's work programs and activities.

Staf Himpunan Mahasiswa Jurusan Teknik Elektro dan Informatika **Januari 2024 – Mei 2024**

Member – Communication and Information Department Staff

- Assist in managing information and publications regarding organizational activities.

- Support the creation and dissemination of content via the organization's communication channels.

PROJECT

Virtual Reality-Based Pharmacy Laboratory
Unity, C#, Virtual Reality

- Developed interactive Virtual Reality-based learning media to simulate the medication compounding process.
- Implemented user interactions with tools and materials within the virtual environment.
- Developed learning features, compounding simulations, and quizzes to support the student learning process..

NusaTani Website – E-Commerce
Web Development

- Developed an e-commerce application to support product management and transaction processes.
- Implemented website features and interfaces based on user requirements.

SEARA Website Design – E-Commerce
UI/UX Design, Figma

- Designed the application's user interface and user experience based on user needs.
- Created wireframes, prototypes, and interface designs using Figma.
- Developed designs with a focus on usability and visual consistency

Internship Project – Asset and Inventory Management System
Web Development, API

- Developed and enhanced features for a web-based application to support asset and inventory management.
- Integrated APIs to facilitate data exchange and management.
- Assisted in the system development and testing processes according to user requirements.

Nutrify – UI/UX Design
Figma, UI/UX Design

- Designed the Nutrify application prototype for a UI/UX competition organized by the Faculty of Computer Science, Universitas Brawijaya.
- Developed designs focused on improving public services and digital literacy.
- Created interface designs and interactive prototypes based on the competition theme.

ACHIEVEMENTS

Finalist Elektro Expo 2024
Semarang State Polytechnic | 2024
Category : Desain UI/UX Web/Apps

SKILLS

Hard & Technical Skill	:	PHP, Dart, C#, JavaScript, Laravel, Flutter, Unity, MySQL, Figma, Git/GitHub, Web Development, Mobile App Development, UI/UX Design, Virtual Reality
Soft Skill	:	Communication, Teamwork, Leadership, Problem Solving, Analytical Thinking, Time Management, Adaptability
